MINNESOTA PUBLIC UTILITIES COMMISSION

NOTICE OF INFORMATIONAL MEETINGS, PUBLIC AND EVIDENTIARY HEARINGS, AND AVAILABILITY OF DRAFT ENVIRONMENTAL IMPACT STATEMENT

In the Matter of the Certificate of Need and Route Permit Applications for the Minnesota Energy Connection Project in Sherburne, Stearns, Kandiyohi, Wright, Meeker, Chippewa, Yellow Medicine, Renville, Redwood, and Lyon Counties in Minnesota

PUC Docket Numbers: CN-22-131 (Certificate of Need) and TL-22-132 (Route Permit) • **OAH Docket Number:** 23-2500-39782

PLEASE TAKE NOTICE that the Minnesota Public Utilities Commission (Commission) will hold public and evidentiary hearings on the applications of Xcel Energy for a certificate of need and a route permit for the Minnesota Energy Connection Project, a new approximately 171- to 174-mile 345-kilovolt (kV) double-circuit transmission line between Sherburne and Lyon counties (MNEC Project). The public meetings/hearings also provide an opportunity to comment on the draft environmental impact statement (draft EIS) prepared by the Minnesota Department of Commerce (Department) for the MNEC Project. The proposed MNEC Project includes the following:

- A new 345-kV double-circuit transmission line between the existing Sherco Substation in the city of Becker in Sherburne County and a new substation (Garvin Substation) proposed near the city of Garvin in Lyon County. Xcel Energy has proposed two route alternatives: the Purple Route, which is 171 miles in length, and the Blue Route, which is 174 miles in length. Xcel has also proposed four connector segments that would provide options to utilize different portions of each alternative route, as appropriate.
- A new 3.1-mile single-circuit 345-kV transmission line co-located on existing structures between the existing Sherco and Sherco Solar West substations in the city of Becker.
- Modifications to the existing Sherco and Sherco Solar West substations, a new voltage-support substation, and a new intermediate substation.

Xcel Energy has requested a route width of 1,000 feet and a final right-of-way width of 150 feet, with the exception of the areas around the substations and conservation easements where the route width would range from 0.3 mile to 1.25 miles to enable flexibility in routing.

In addition to the routes proposed by Xcel Energy in its application, 48 alternative route segments, 11 alternative route connectors, and four alignment alternatives were evaluated in the draft EIS prepared for the proposed MNEC Project. The draft EIS also evaluated system alternatives to the proposed MNEC Project which include modified generation (nuclear or natural gas) at the Sherco plant, new generation plants (nuclear, natural gas, solar, or wind) closer to the Sherco plant, underground transmission line construction, and a no-build alternative.

If any reasonable accommodation is needed to enable you to fully participate in these hearings, please contact the Commission at 651-296-0406 or 1-800-657-3782 at least one week in advance of the meeting. To find out if a hearing is canceled due to bad weather or other call 1-855-731-6208 or visit mn.gov/puc.

will have an opportunity to review maps and materials on the proposed MNEC Project and ask questions of Xcel Energy and state staff. During this time, comments made by attendees will become a part of the record for consideration only if the attendee submits the comment in writing. Forms will be available for this purpose.

The formal public meetings/hearings will be conducted by an administrative law judge with the Office of Administrative Hearings, who will provide the Commission with findings of fact, conclusions of law, and a recommendation.

The purpose of the public meetings/hearings is to obtain public input on the proposed MNEC Project, the drafts EIS, and compile the record for the Commission to consider in making a final decision on the certificate of need and route permit applications. Specifically, interested persons will have the opportunity to: (1) ask questions of state staff and the applicant; (2) offer oral and written comments on the merits of the proposed project and on the draft EIS; and (3) suggest possible conditions to be considered for inclusion in a certificate of need and a route permit.

- Comments received at the hearings and during the comment period will be used to: 1) develop the final EIS, to the extent that comments relate to the draft EIS; and 2) inform the record to help the Commission make its final decision.
- The information presented will be the same at all in-person and online hearings.
- The hearings will end when all attendees have had the opportunity to comment and all other business has been concluded, or the scheduled end time of the hearing, whichever occurs first.
- Members of the public may participate without the necessity of intervening as a party; representation by legal counsel is permitted but not required.

COMMENT PERIOD

Written comments will be accepted through **November 25, 2024, by 4:30 p.m.** Please include the docket number in all communications. Comments received after the close of the comment period may or may not be considered by the Commission.

Topics for Comment

- What information needs to be clarified or included in the draft EIS to ensure that the final EIS is complete and accurate?
- Should the Commission grant a certificate of need for the proposed MNEC Project?
- If granted, what additional conditions or requirements should be included in a certificate of need?
- Should the Commission grant a route permit for the proposed MNEC Project?
- If granted, which proposed route alternative best meets the route selection criteria, and what additional conditions or requirements should be included in a route permit?
